

Tips and Tricks

To remove and clean the mouthpiece, just lift it off, clean with soap and water, and press it back on. It's a great way to avoid spreading germs when sharing the device.

Or use the provided second mouthpiece and you can each have your own!

Makeup remover wipes are a great way to clean all surfaces, especially the front plate surface (shown at left).

Remove excess ash by using the provided poker to feed thru the bowl, or remove bowl and discard ash.

Rest the poker on the top for easy access, magnets keep it in place!

Parts list

- | | |
|-------------------|--------------------------|
| 1. Front Nose | 7. Mouthpiece |
| 2. Bowl | 8. Cooling Pipes |
| 3. Bowl Grommet | 9. Cooling Pipe Grommets |
| 4. Inner Liner | 10. Bottom Cover |
| 5. Inner Tray | 11. Bottom Cover Seal |
| 6. Main Container | 12. Bottom Cover Screws |

Recommended Cleaners

1. Isopropyl Alcohol is the recommended cleaner and is safe for use on all surfaces. Swish with a few ounces, rinse with water, and let air out before using device afterward.

- Medical Grade 99.9% Isopropyl Alcohol is the most effective cleaner (available on Amazon).
- Any isopropyl alcohol 70% or higher will work. Add salt when swishing in the chamber for improved stain removal.

2. Makeup remover wipes (such as Neutrogena wipes) are a quick and easy way to clean the exterior or interior surfaces of the device. The can be used on all surfaces and are void of harsh chemicals.

Personal Smoking Device

Instructions for Use

Thank you for purchasing the Perfect Puff Water Pipe!

This product was designed with 3 principles in mind: Durability, Functionality, and Comfort. Combining state of the art materials with a modern and clean look, it's unlike anything you've ever seen. Enough talk, let's get started!

1. Fill the chamber with cold water to the fill line (contour line on metal front). If necessary, use the provided 4oz water container.

2. Load bowl evenly.

For a smoother toke, grind or layer product. Do not pack too tightly.

3. Hold comfortably, cover carb with thumb.

4. Light bowl and inhale. When chamber is full or when desired, release thumb from the carb and inhale.

5. Relax!

Features

*Extra mouthpiece, liner, and tray included in stash Jar.

Cleaning and Maintenance

Regular cleaning and maintenance will ensure optimal performance. Usually a quick clean is all that is needed, but Perfect Puff can also be fully disassembled to clean every inch and make it look like brand new.

Quick Clean

1. Remove the bowl by turning and pulling. Use the poker to rotate around the bottom of the stem to remove any resin or buildup.

2. Split open by pulling apart firmly. This exposes the disposable liner and tray in the front chamber.

3. Remove the liner and tray by pulling on the outer edge of the liner. Dispose of them and replace with a fresh set.

4. Pour a few ounces of isopropyl alcohol into the rear chamber and swish for 30 seconds to remove staining. Pour out and rinse with warm water.

How to disassemble and deep clean

1. Split the device open by pulling the front and rear halves apart firmly (step 2 at left).

2. Remove the two screws on the front plate. Slip-on knobs included in travel case to ease removal.

3. Remove the bottom cover.

4. Remove the cooling pipes.

5. Clean all parts and surfaces with alcohol or makeup remover wipes. Rinse with warm water. Dry with a paper towel if desired.

6. Reassemble all items. Attach the bottom cover by sliding its tab into the slot at the rear of the device, then press up on the front until the holes line up, and install the screws. Tighten screws until the rubber washers start to compress.

7. On the front chamber, remove and replace the inner liner and tray.

8. Remove and clean the bowl stem using the poker (step 1 at left).

9. Wipe down the front chamber with alcohol or wipes, and replace all parts.

10. Snap the front and rear halves back into place. You now have a brand new device!
